

KOMAND Version 7.3.0 Now Available!

April 23, 2018

Dear **KOMAND** Customer:

PACE Applied Technology, Inc. announces the availability of the latest KOMAND release (version 7.3.0). PACE continues to add support for new hardware and software platforms as well as fixing reported problems. For a list of updates to this release, please visit our web site at www.pace.us.com. Click on the "KOMAND V7.3 Is Now Available" banner at the top of the page for a description of specific updates.

Customers currently on maintenance may send an email to [Bob Beard](mailto:BBeard@pace.us.com) BBeard@pace.us.com or call PACE at 703-369-3200 and choose the Customer Support option to request the new release.

Customers may contact [Don Carlson](mailto:dcarlson@pace.us.com) (dcarlson@pace.us.com) for information about our on-site custom training and consulting services. Don can also help organizations with limited staff apply and test the new release. There are advantages to having us come to you for training and analysis of your IT resource accounting process. Classes may be tailored to the products and subjects your organization needs and Don can streamline your current process. Taken together, these benefits can result in less time required from staff and savings for your organization.

When visiting our web site, check out our **Server Charging System for Windows® (SCSW)**. **SCSW** collects process accounting data from the Windows® System Resource Manager (WSRM) and generates chargeback data in the format used by the KOMAND z/OS component or it can feed directly into our KIM PC database (For Windows 2003 Server Datacenter and above).

If you are interested in learning more about **SCSW**, or any other KOMAND products, please contact [Mike Cox](mailto:mcox@pace.us.com), Director of Sales, at mcox@pace.us.com or 703-723-5863.

Thank you for your continued use of PACE Applied Technology's KOMAND family of IT Enterprise resource accounting products.

Sincerely,

Bob Beard

Director, PACE Support Services
